Program Title: Minor in Health (21045)

Department Offering Program: Department of Health and Human Performance
College of Health Professions and Human Services

Catalog Description: The Health Minor provides a strong foundation for students to learn and address the physical, social, psychological, cultural, and clinical needs in regard to health from an interdisciplinary, intersectional and social justice perspective. Students will be able to apply this specialized knowledge and expertise in the field of public health to their major discipline of study and thus increase their graduate and employment opportunities.

Program Objectives:

1. Evaluate knowledge of health risks, disease and wellness in diverse populations.
2. Demonstrate the ability to serve as a public health professional resource by assessing the needs, resources and capacity for health promotion.
3. Exhibit critical thinking, communication skills and knowledge necessary to plan health promotion programs across the lifespan and in a variety of settings.
4. Analyze research related to health promotion.
5. Implement, organize and manage health promotion programs in diverse communities.

Students with a minor in **Health** are required to complete 15 credits for the minor. One core course (3 credit hours) and four additional courses from designated electives (12 credit hours) will be required for completion of the minor program. A minimum of six credit hours (2 courses) must be from upper division (3000-4000) level courses.

The minor requires that students must maintain a grade of 'C' or better in all courses taken for the minor. Class substitutions will be considered at the discretion of the Health Minor Program Coordinator and Public Health Program Coordinator.
