

LET'S TRY TO SUSTAIN...KEAN!

THE ORIGIN STORY

Sustainability is a complex word to interpret, in fact in 1987 the United Nations Brundtland Commission defined it as "meeting the needs of the present without compromising the ability of future generations to meet their own needs."

In simpler terms, being able to co-exist now and later.

What does it mean to co-exist? Coexisting is living at the same time or in the same place.

WHY IS KEAN A FOCUS?

Kean University in Union, NJ reported to have an estimate of 10,500 students as of the fall 2021.

With this many people coming in and out of the same location, we want to make it the best we can!

Kean University has a lot of resources and clubs that students can join in order to protect our environment; however, these clubs are poorly promoted. Check out these clubs students can join :

425 MAG

This organization is to showcase student work, highlight campus culture, and promote cross-curricular collaboration in a professional environment

KEAN GARDENING CLUB

This club is to help students learn about and participate in gardening with a friendly community.

KEAN D.E.S.S

The Kean Department of Environmental and Sustainability Sciences. This department focuses on : sustainable tech, renewable energy, and the earth
